

Un petit jeu sur la symétrie

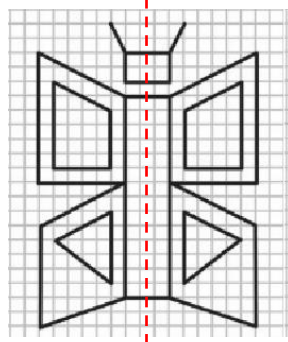

Ce jeu est né d'un travail réalisé avec un élève. Il est donc adapté à son niveau et à ses besoins.

Bon amusement ...

Jeu sur de la symétrie

Matériel : cubes de 1 cm / 1 cm de 10 couleurs différentes : bleu, vert clair, brun, jaune, rouge, noir, rose, blanc, orange et vert foncé. On peut aussi utiliser des jetons de couleurs. (voir dernière page)

Peut aussi se réaliser avec des crayons de couleur, l'enfant colorie les cases.

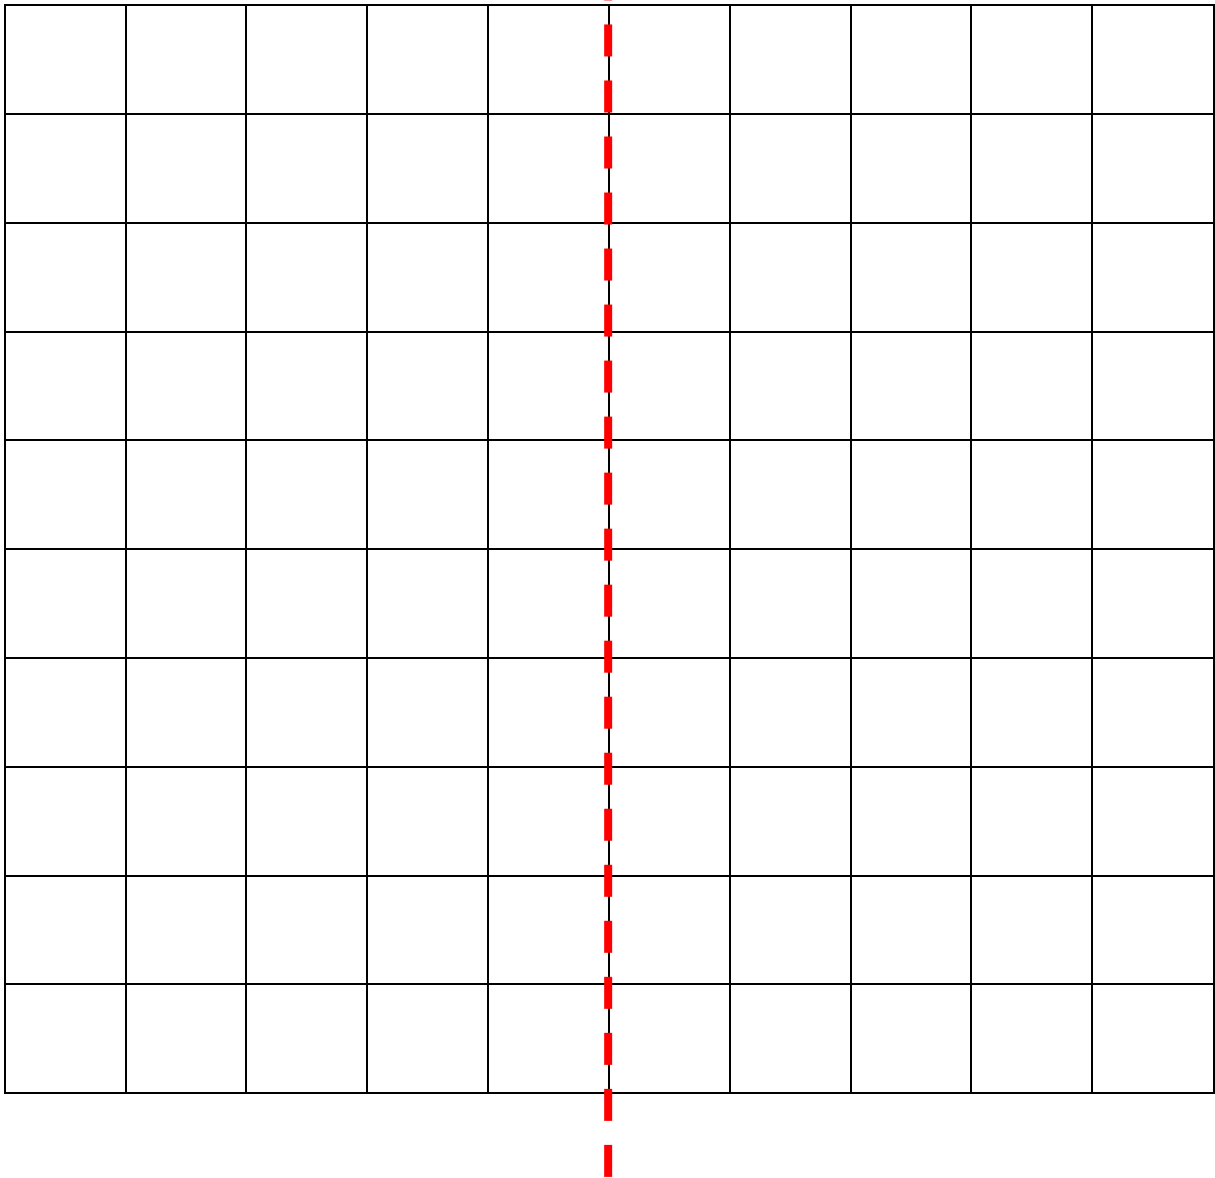

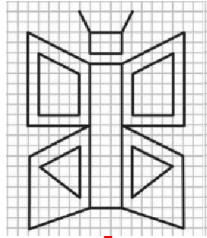

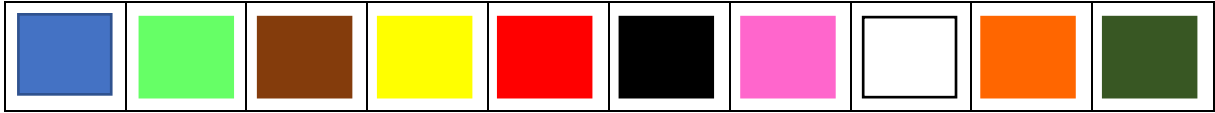

Consigne : poser les cubes sur les carrés de même couleur puis compléter le motif de l'autre côté de la ligne rouge en pointillés en miroir. Tout ce qui est à droite passe à gauche et tout ce qui est à gauche, passe à droite.

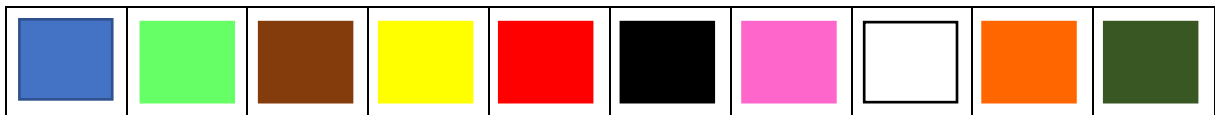

La première feuille vide permet d'inventer de nouveaux motifs pour l'enfant ou avec l'enfant.

Il n'y a pas d'ordre, les dessins sont venus en fonction de notre inspiration.

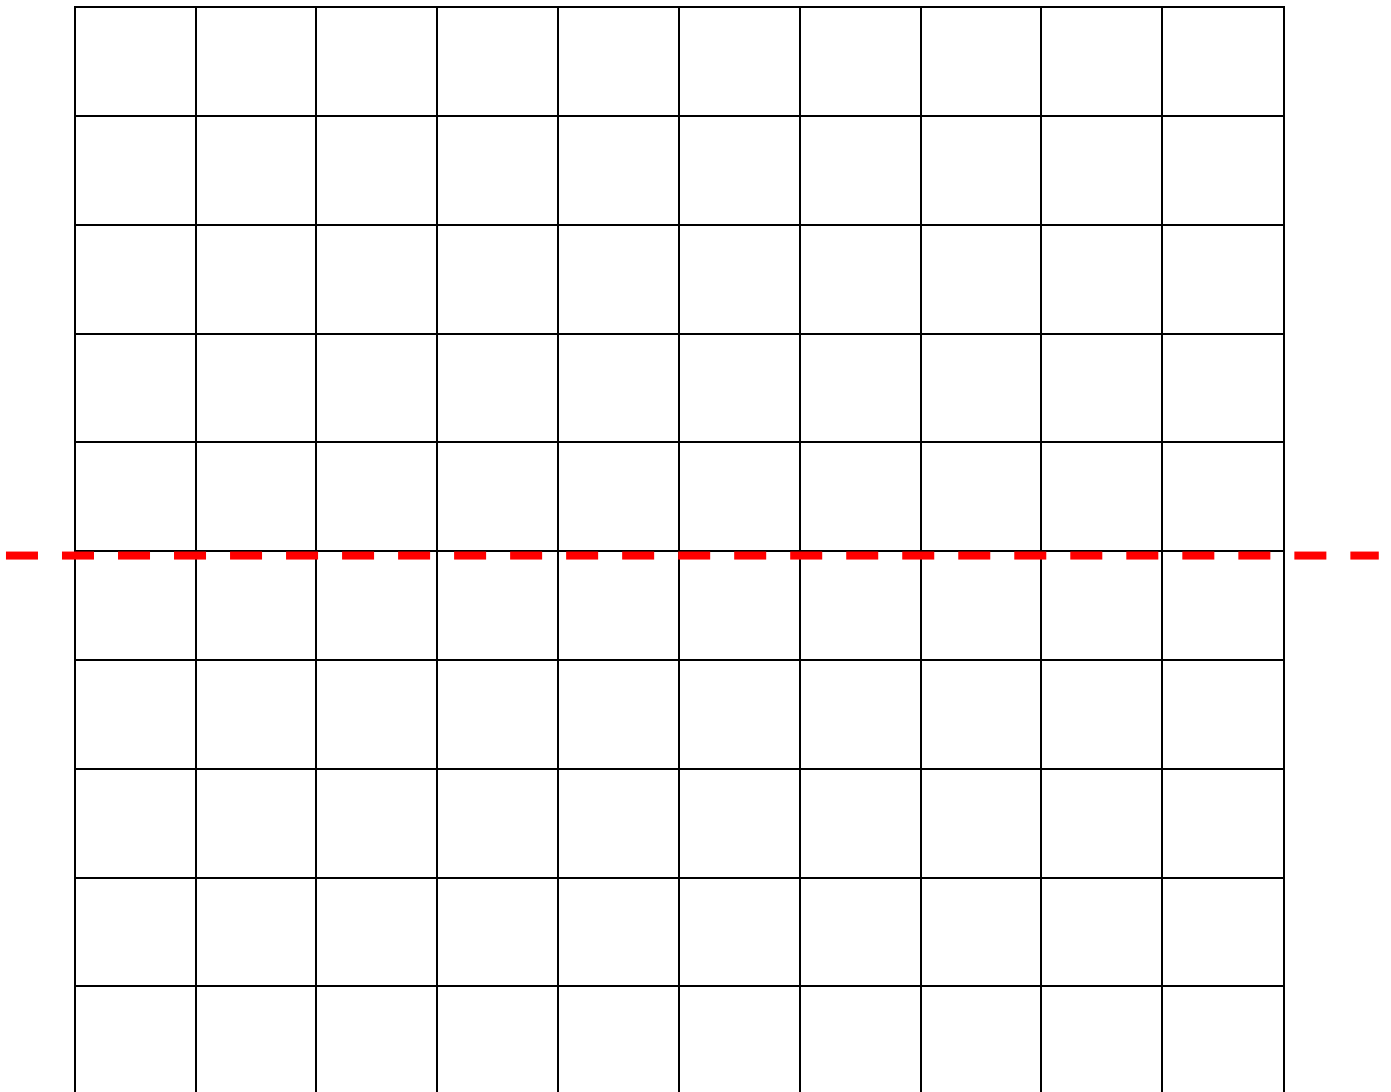

Fiche 1 et 2 : chacun met un point à tour de rôle dans la case de son choix et de la couleur de son choix. L'enfant peut après réalisé le même travail que sur les autres fiches.

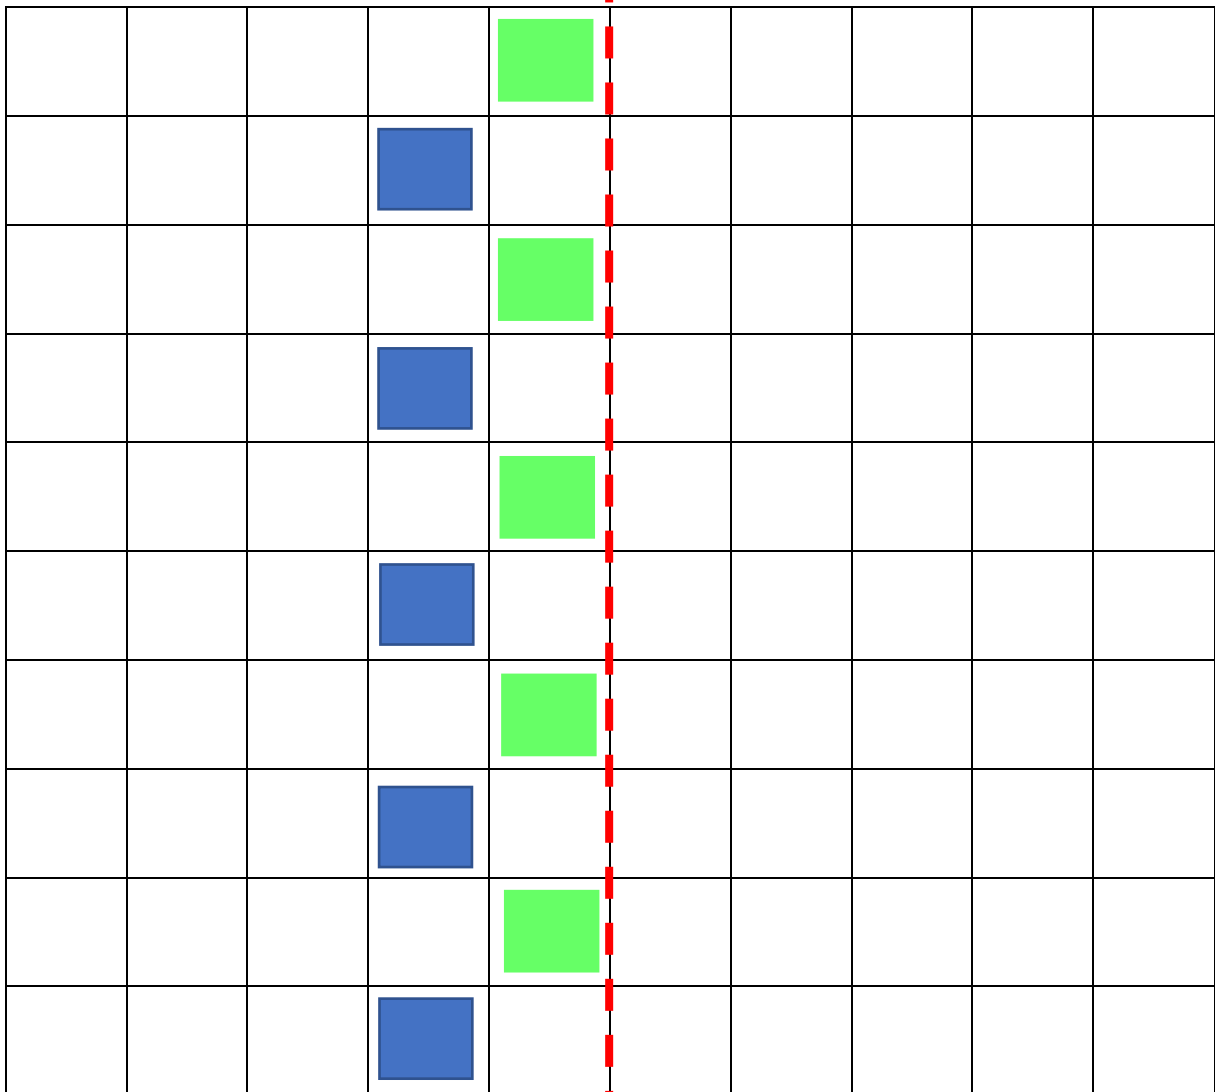

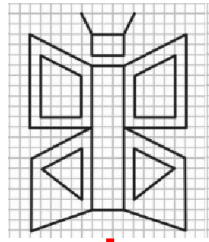

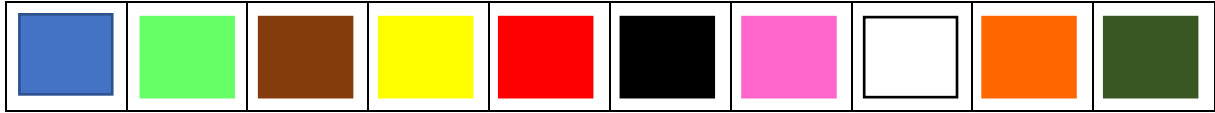

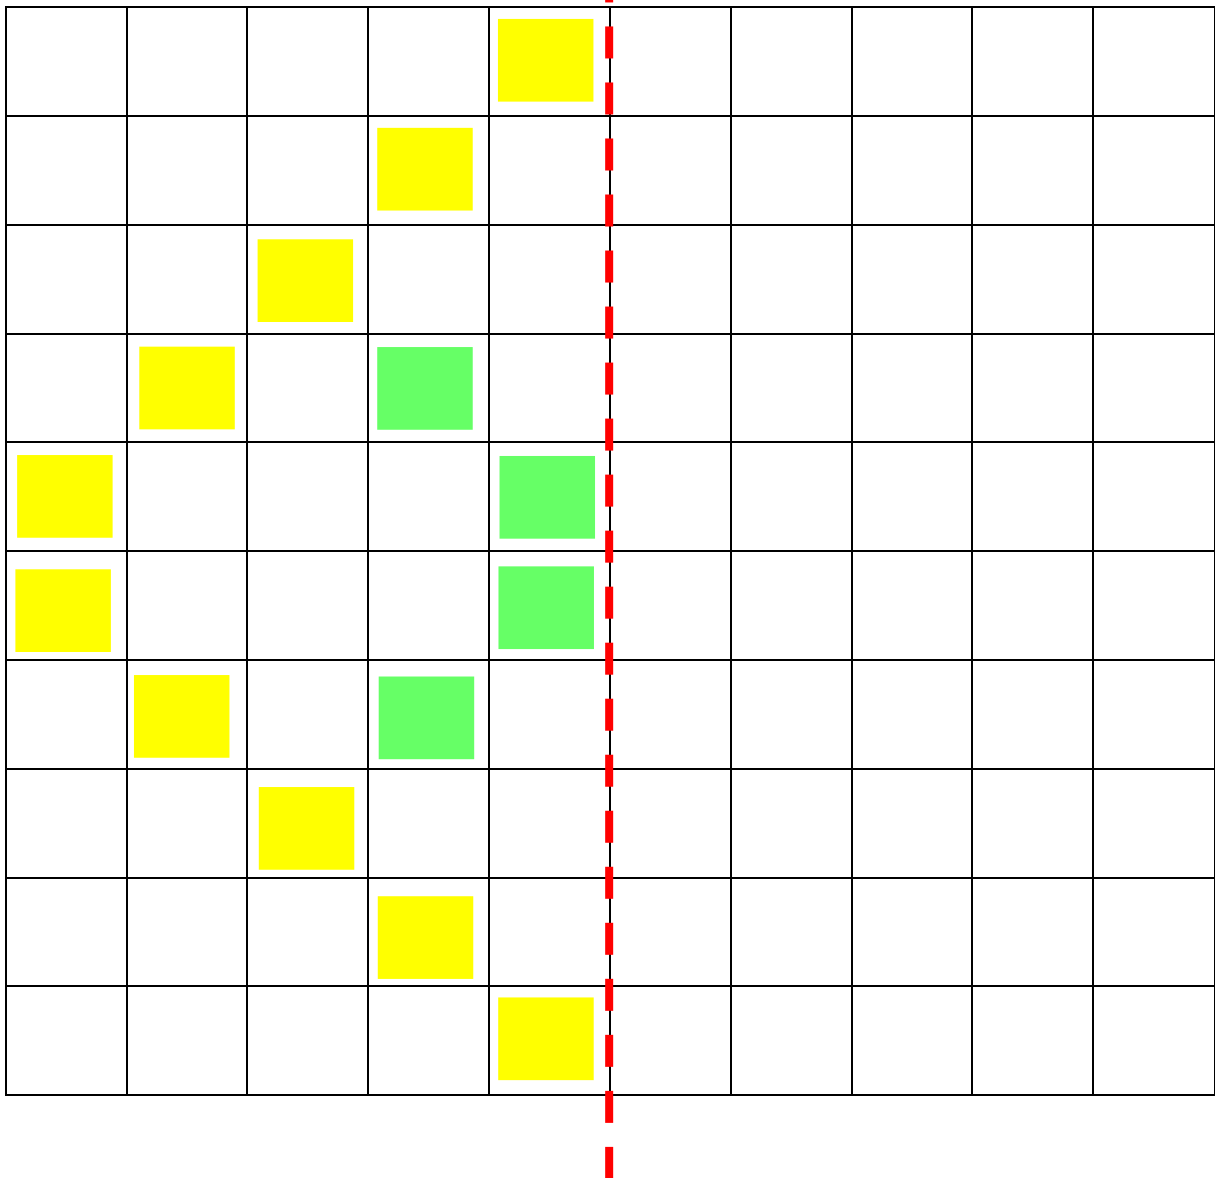

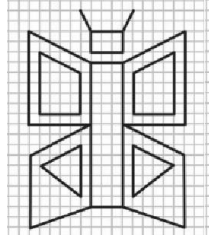

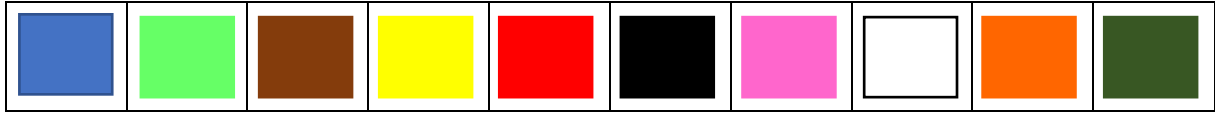

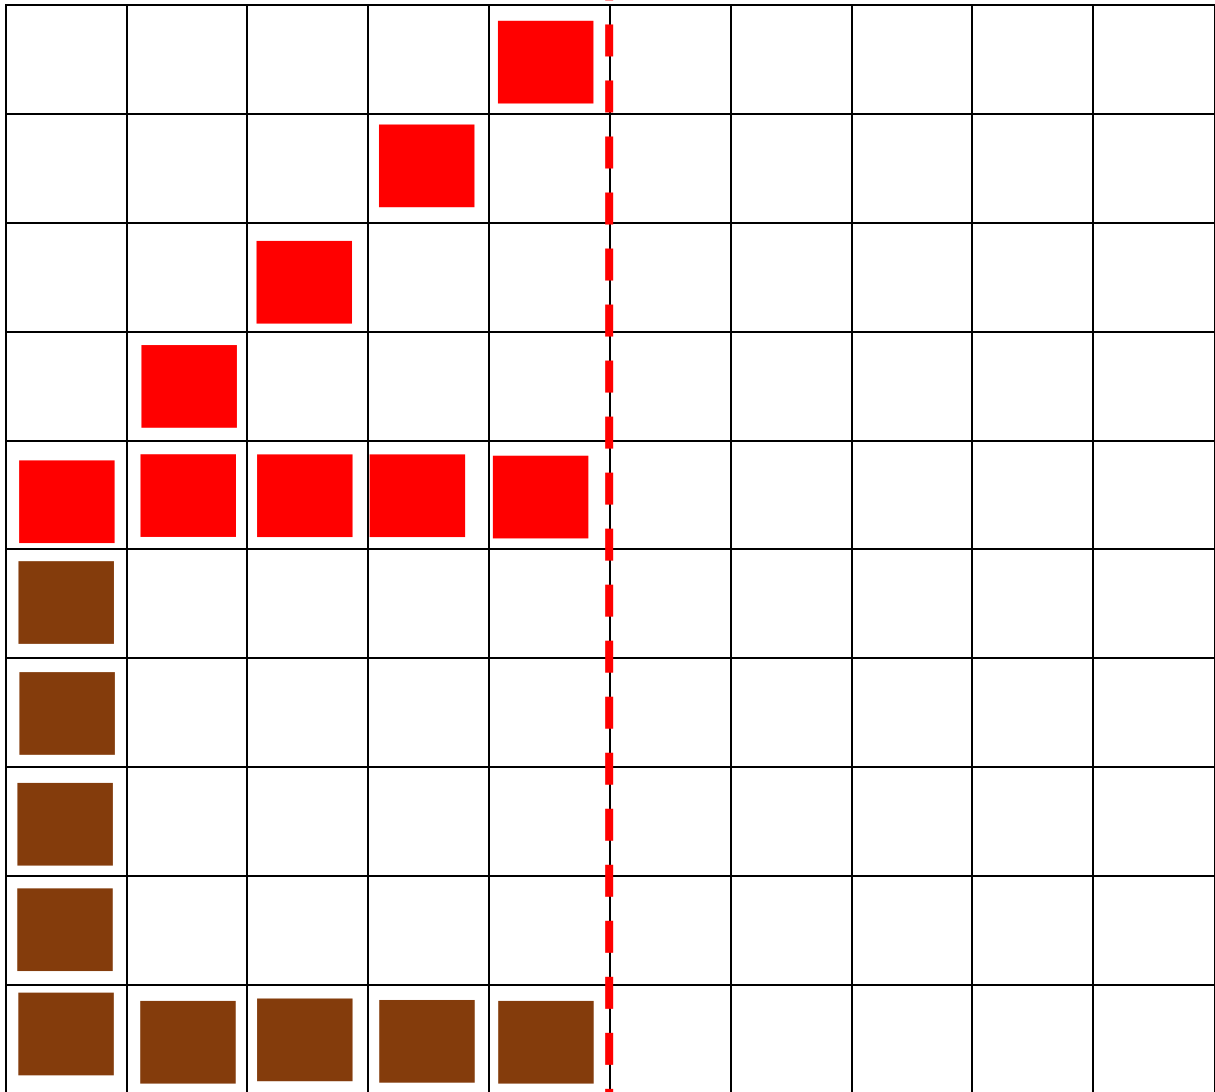

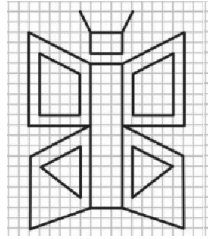

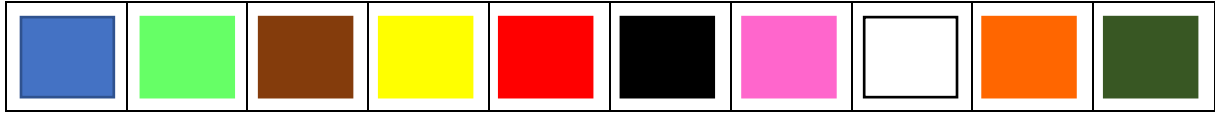

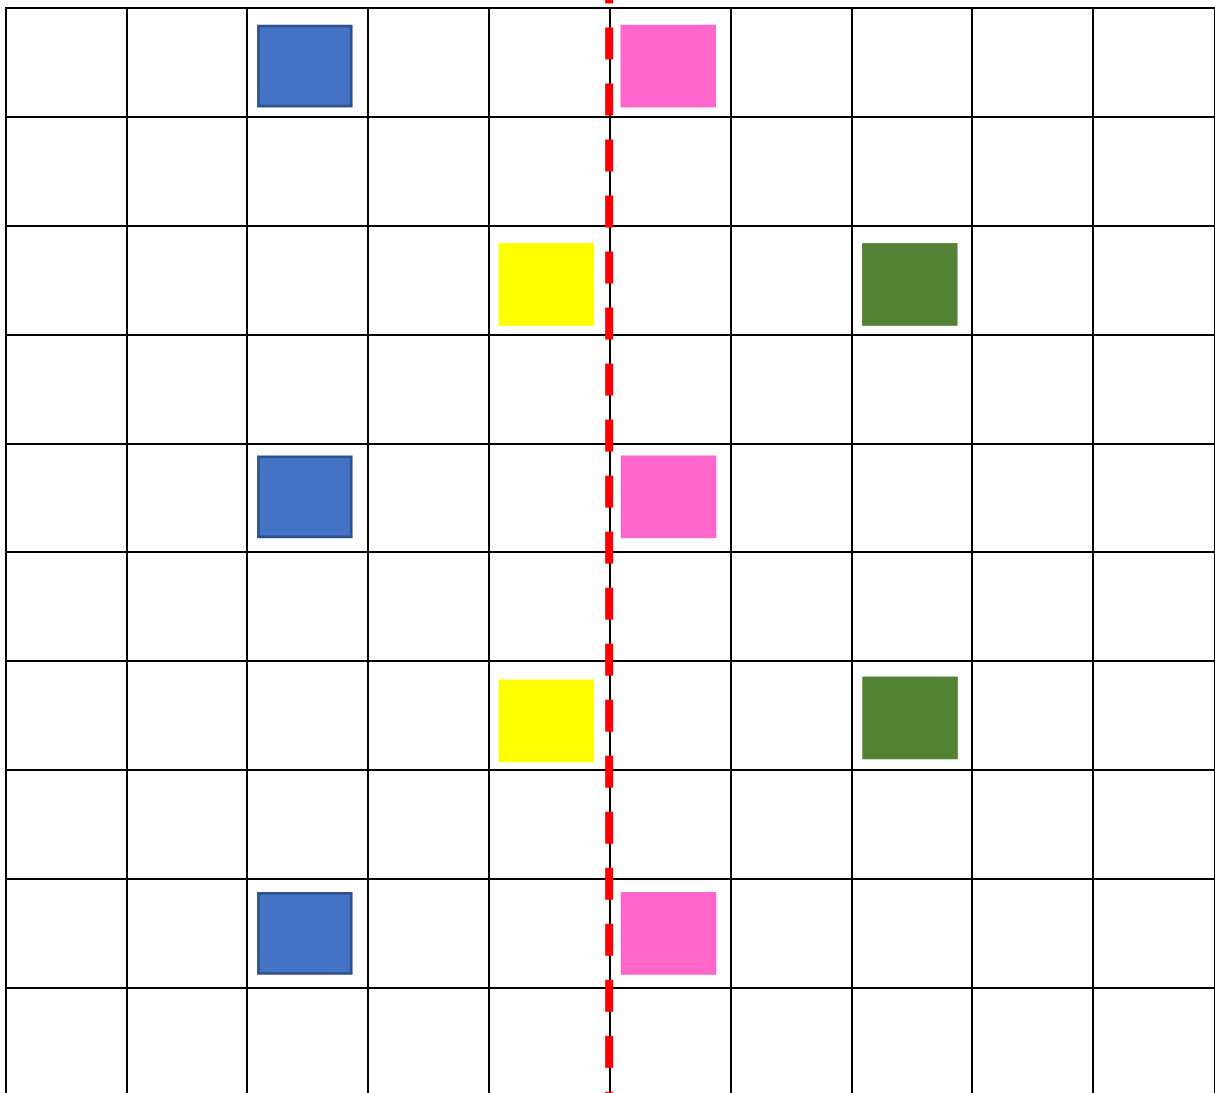

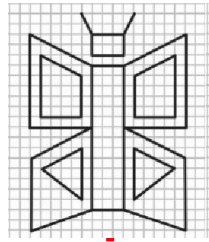

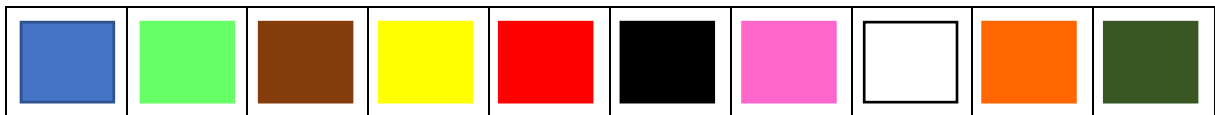

SYMÉTRIE ΣΥΜΕΤΡΙΕ

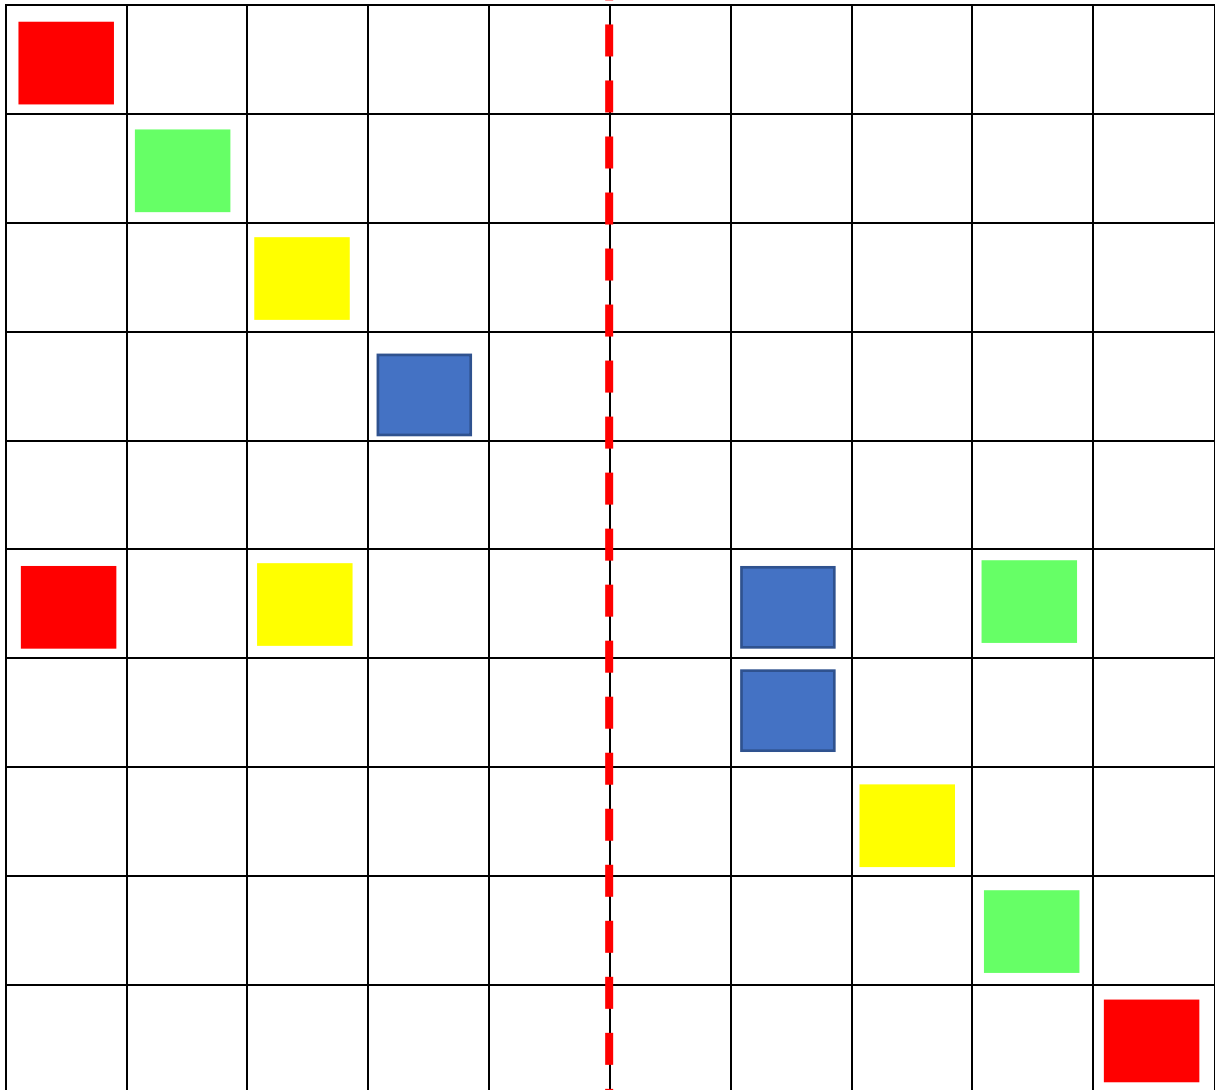

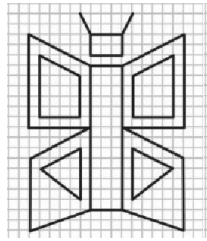

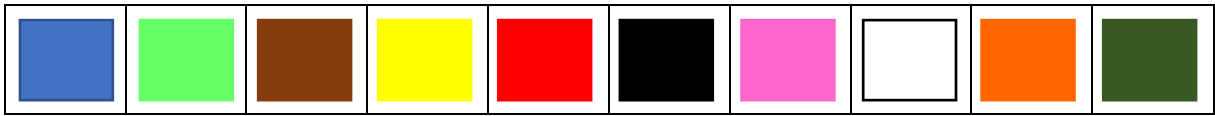

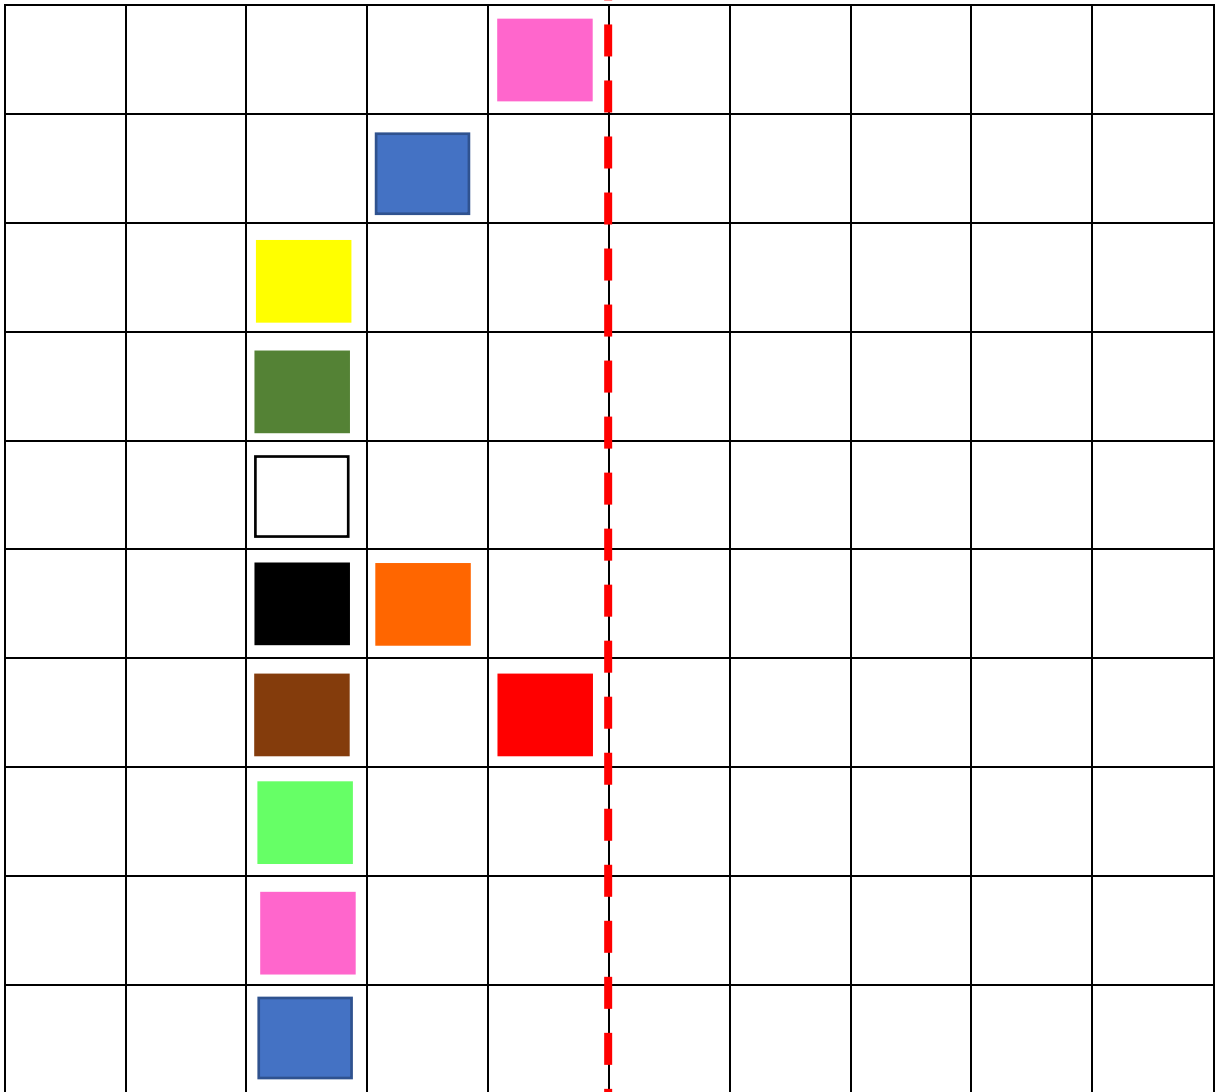

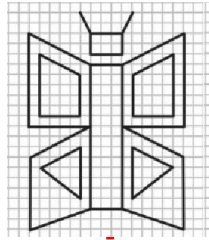

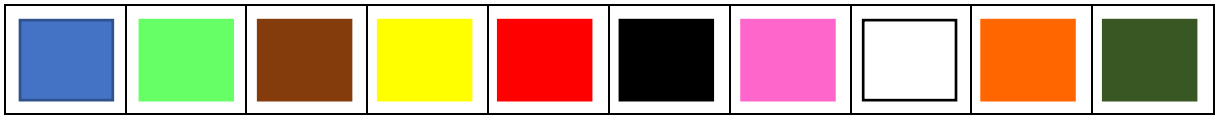

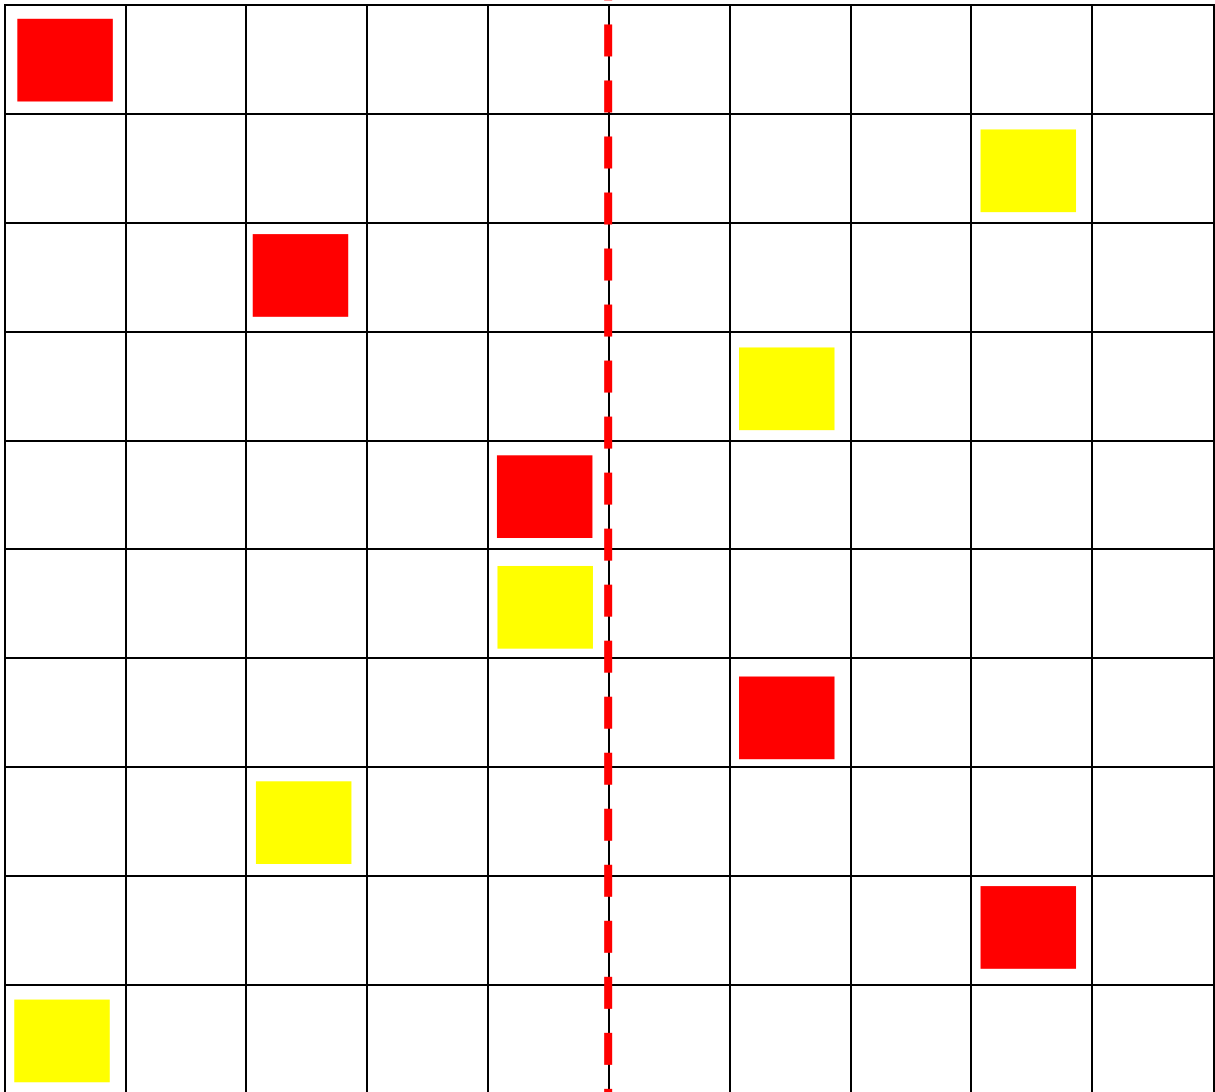

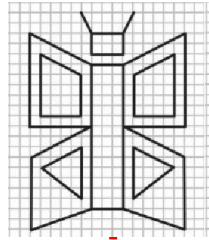

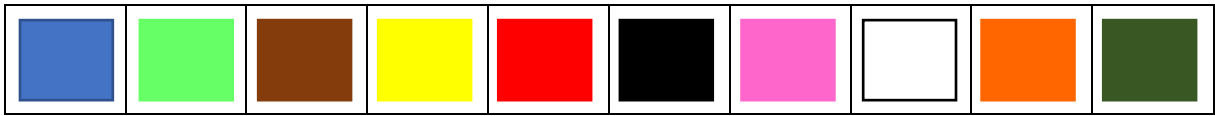

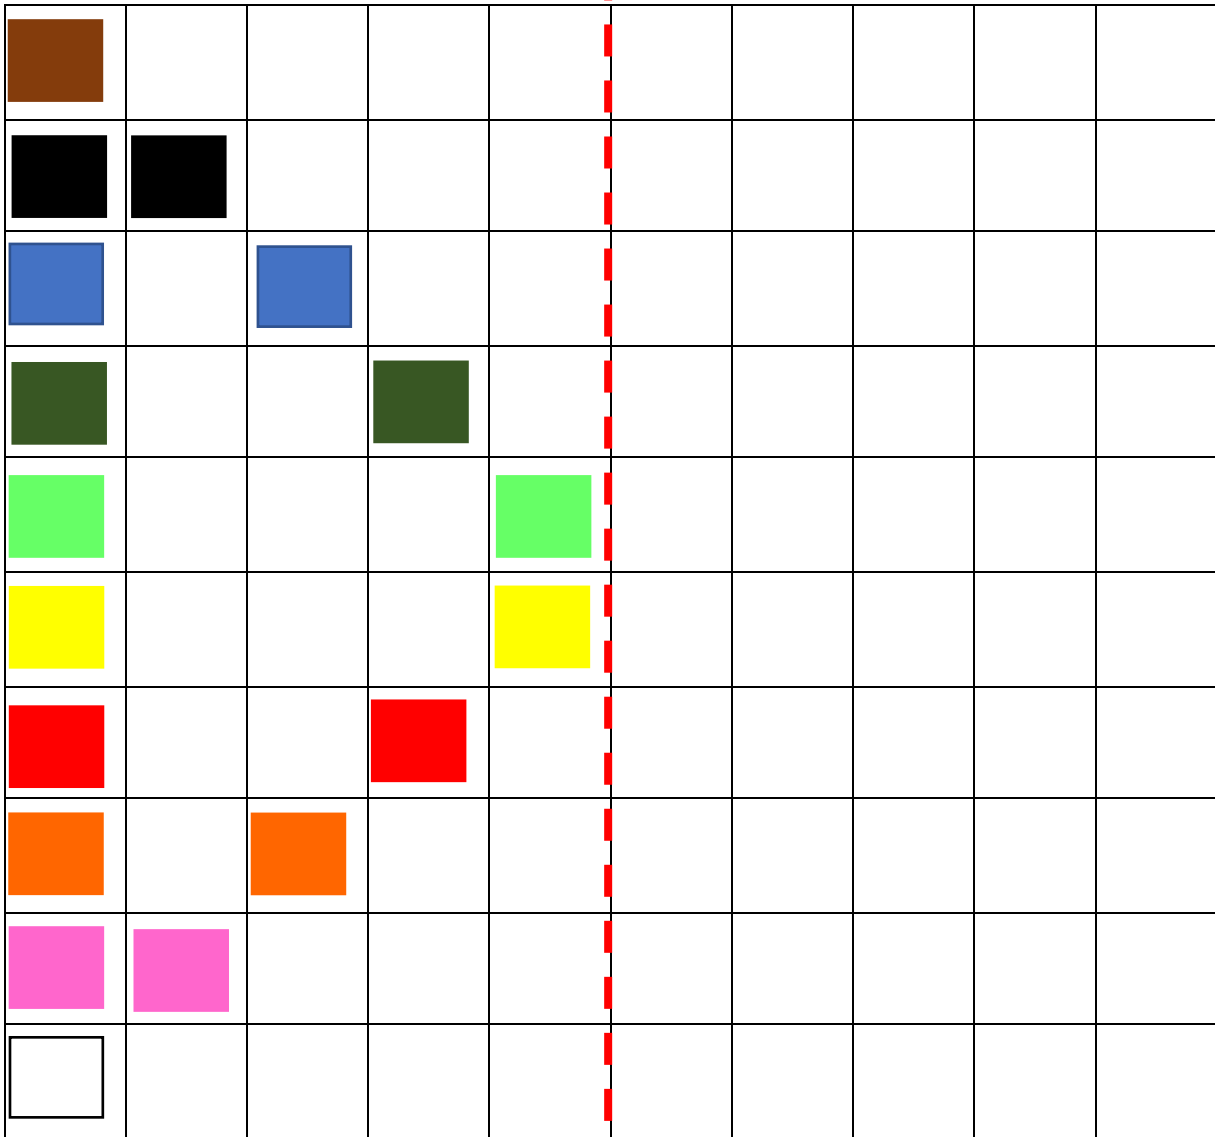

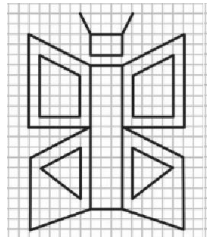

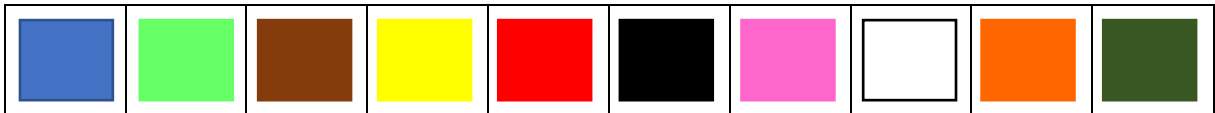

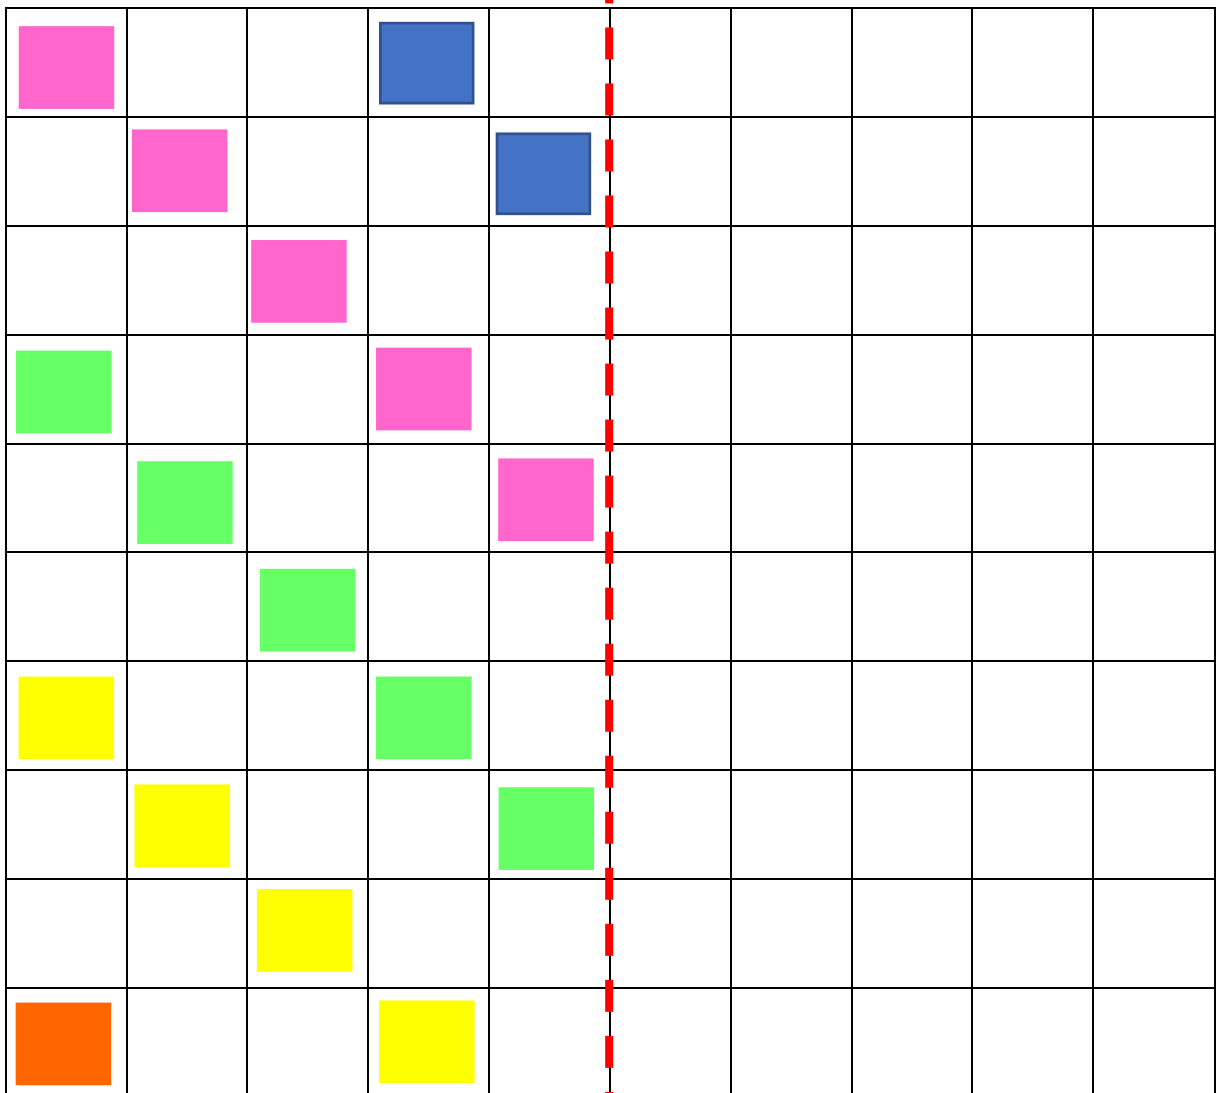

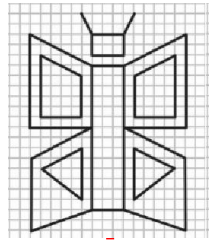

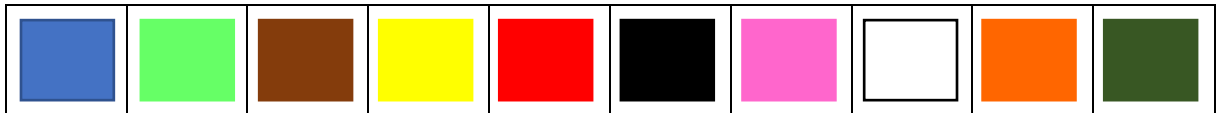

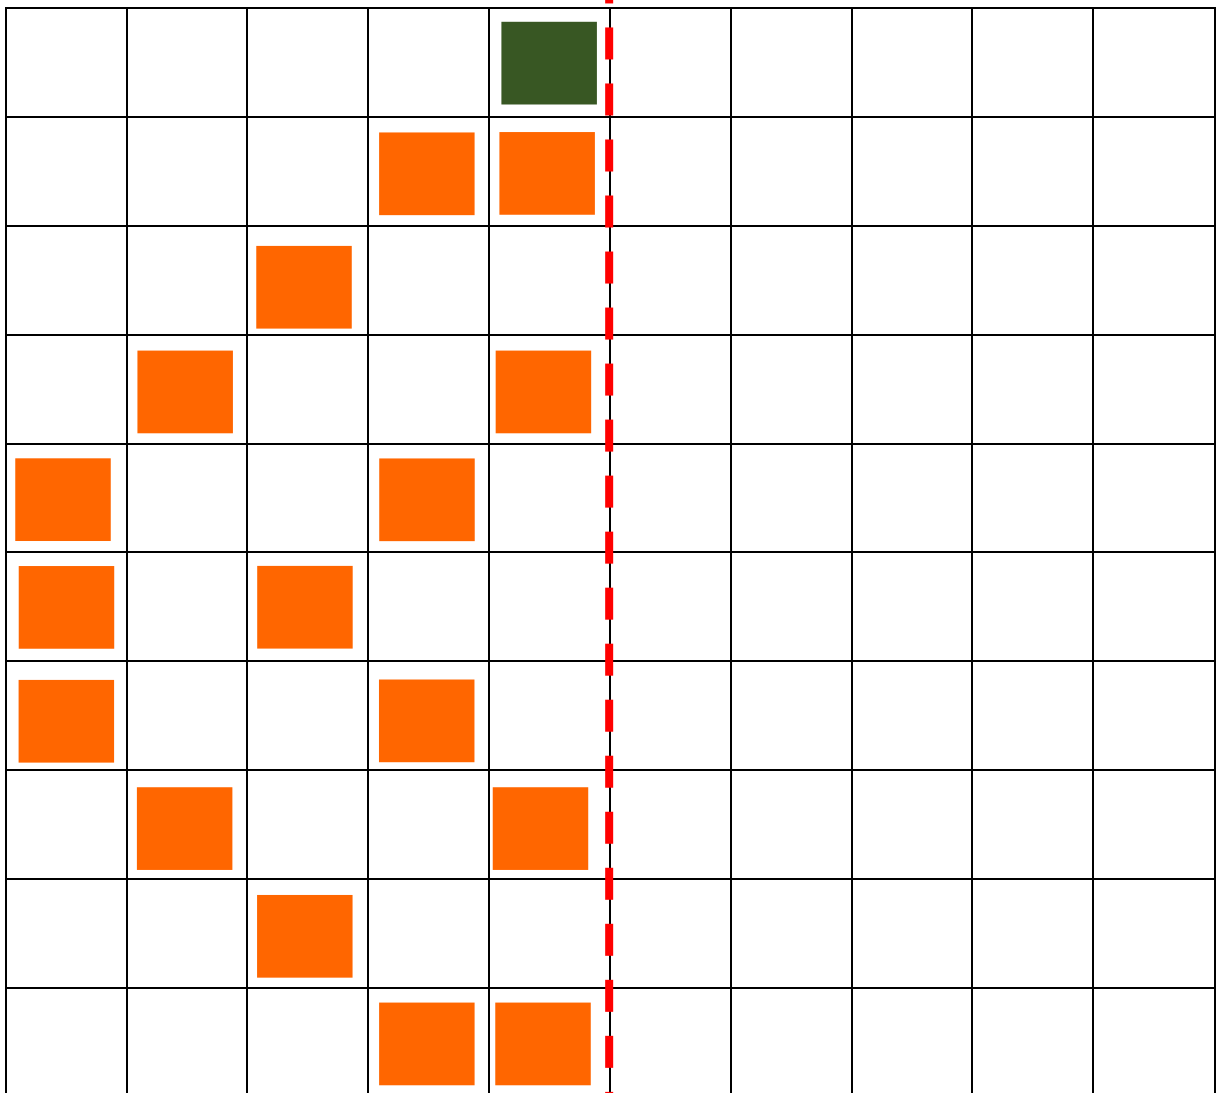

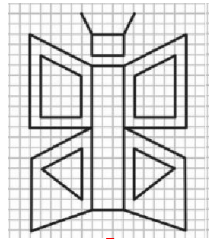

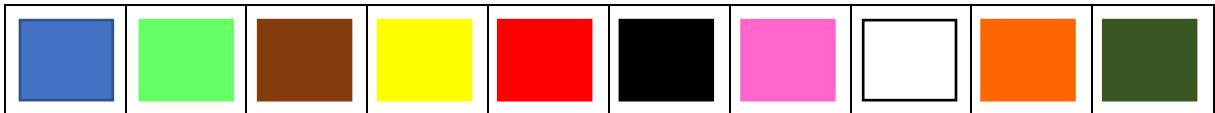

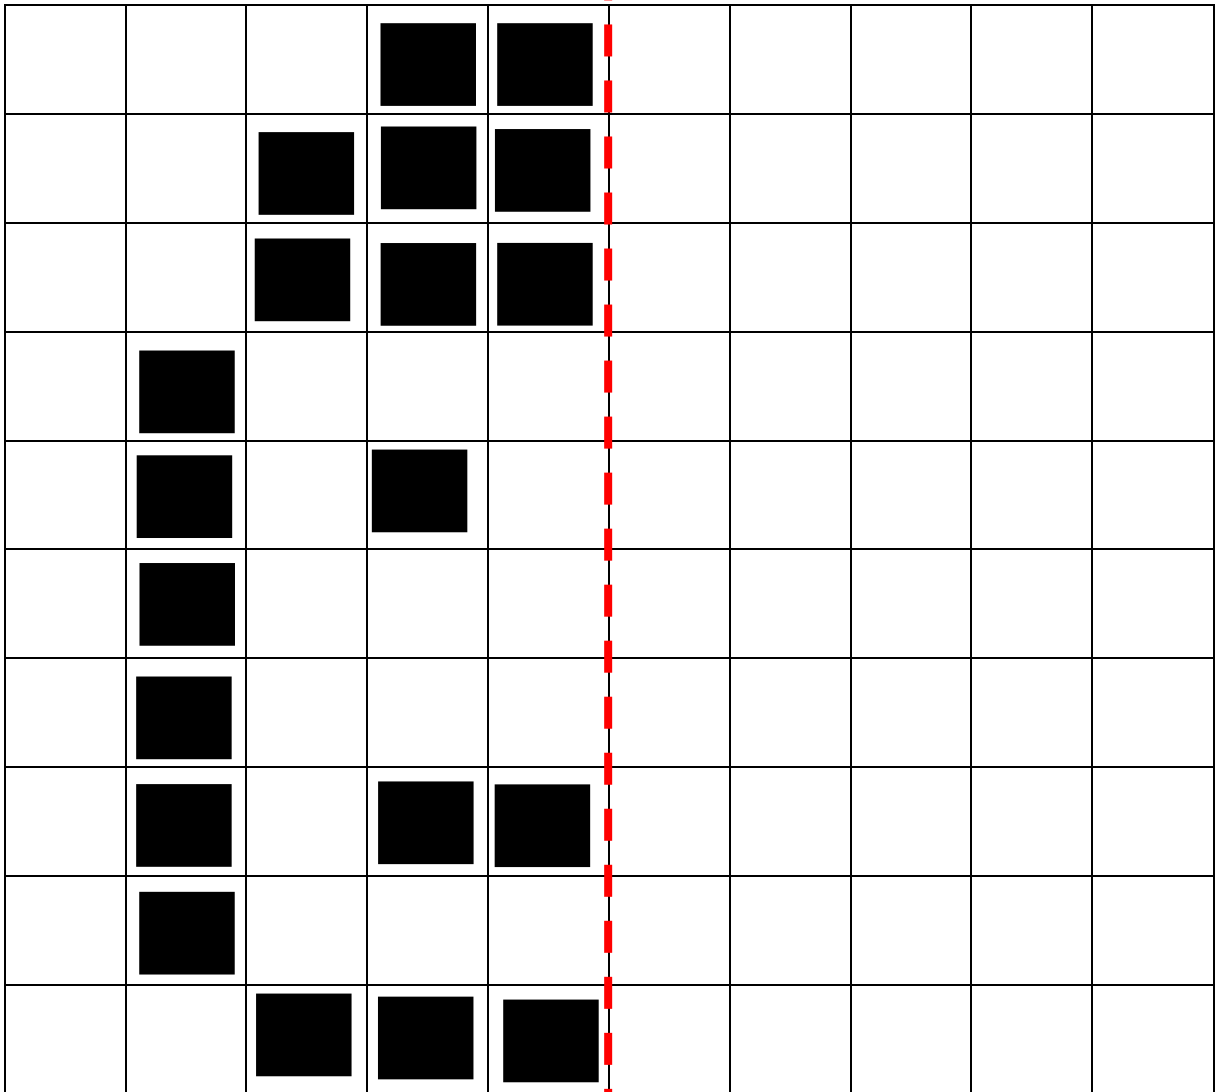

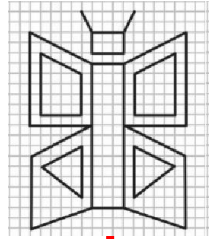

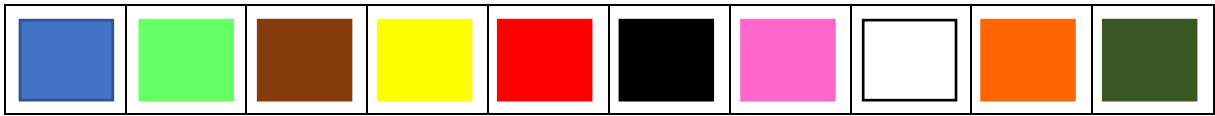

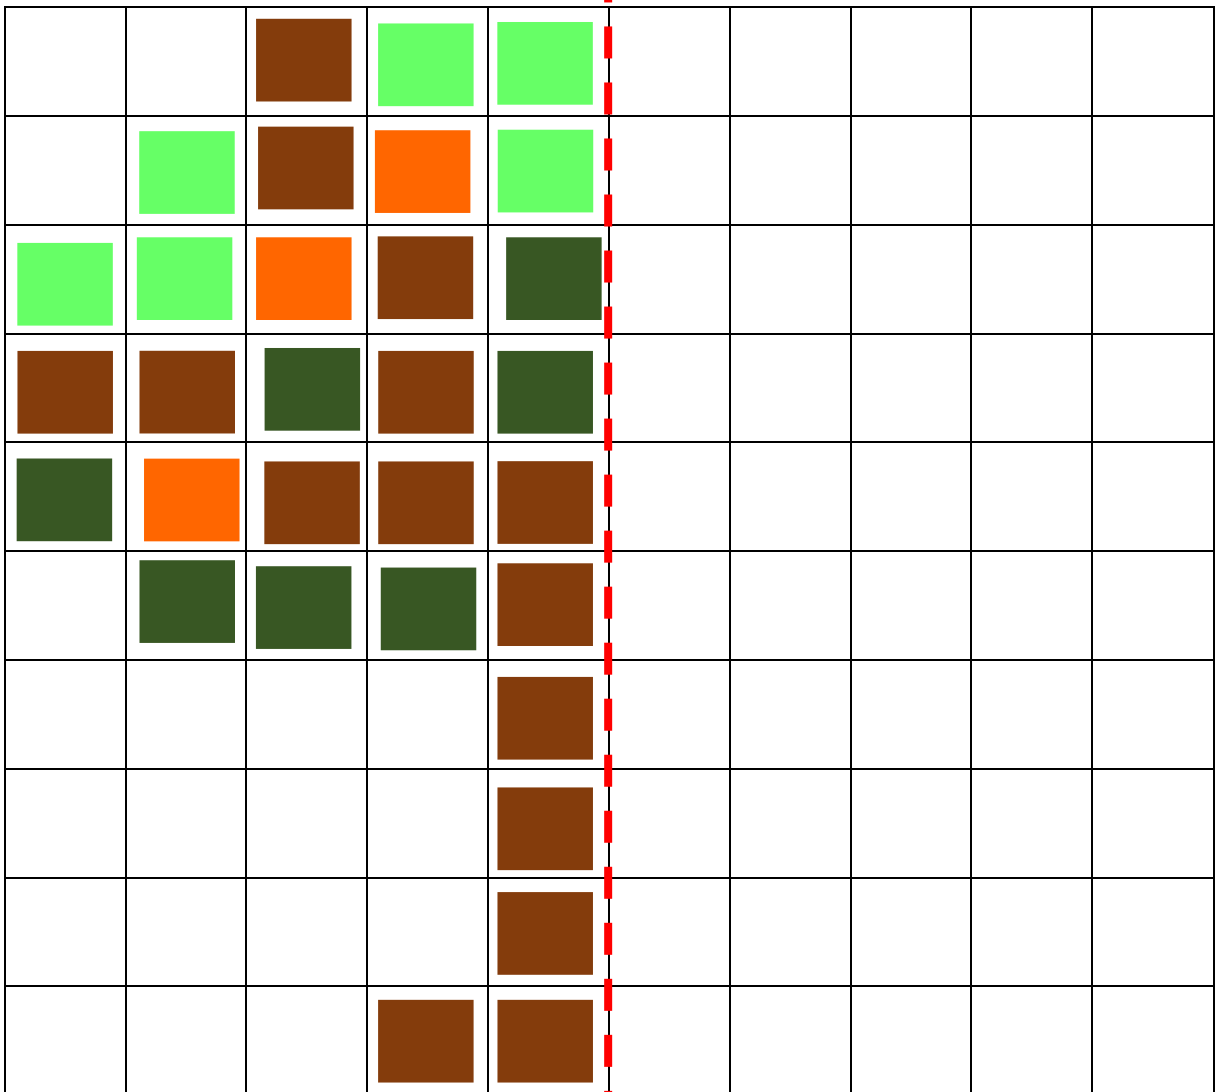

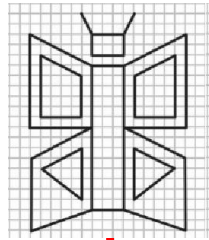

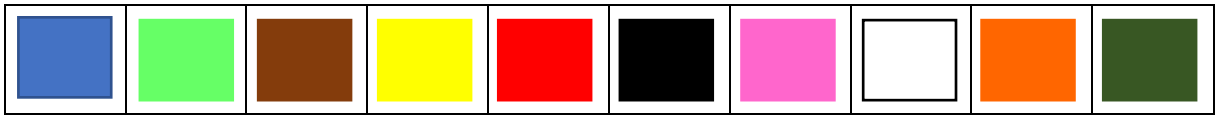

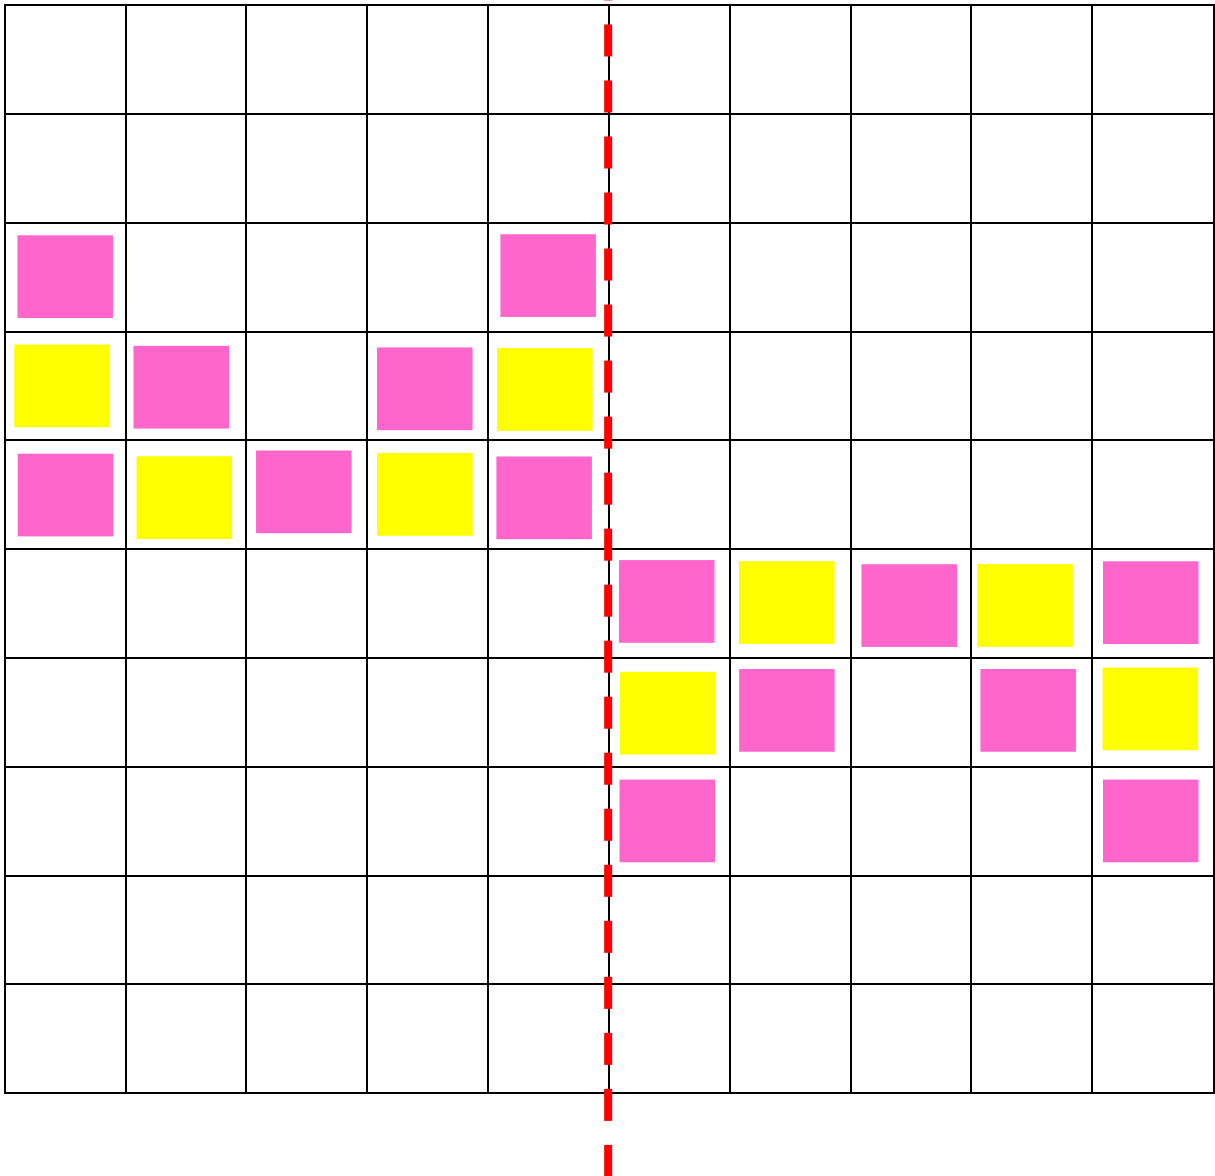

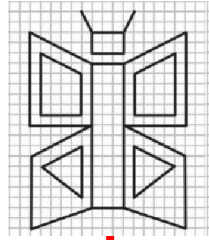

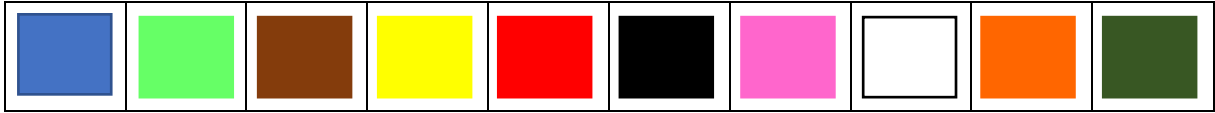

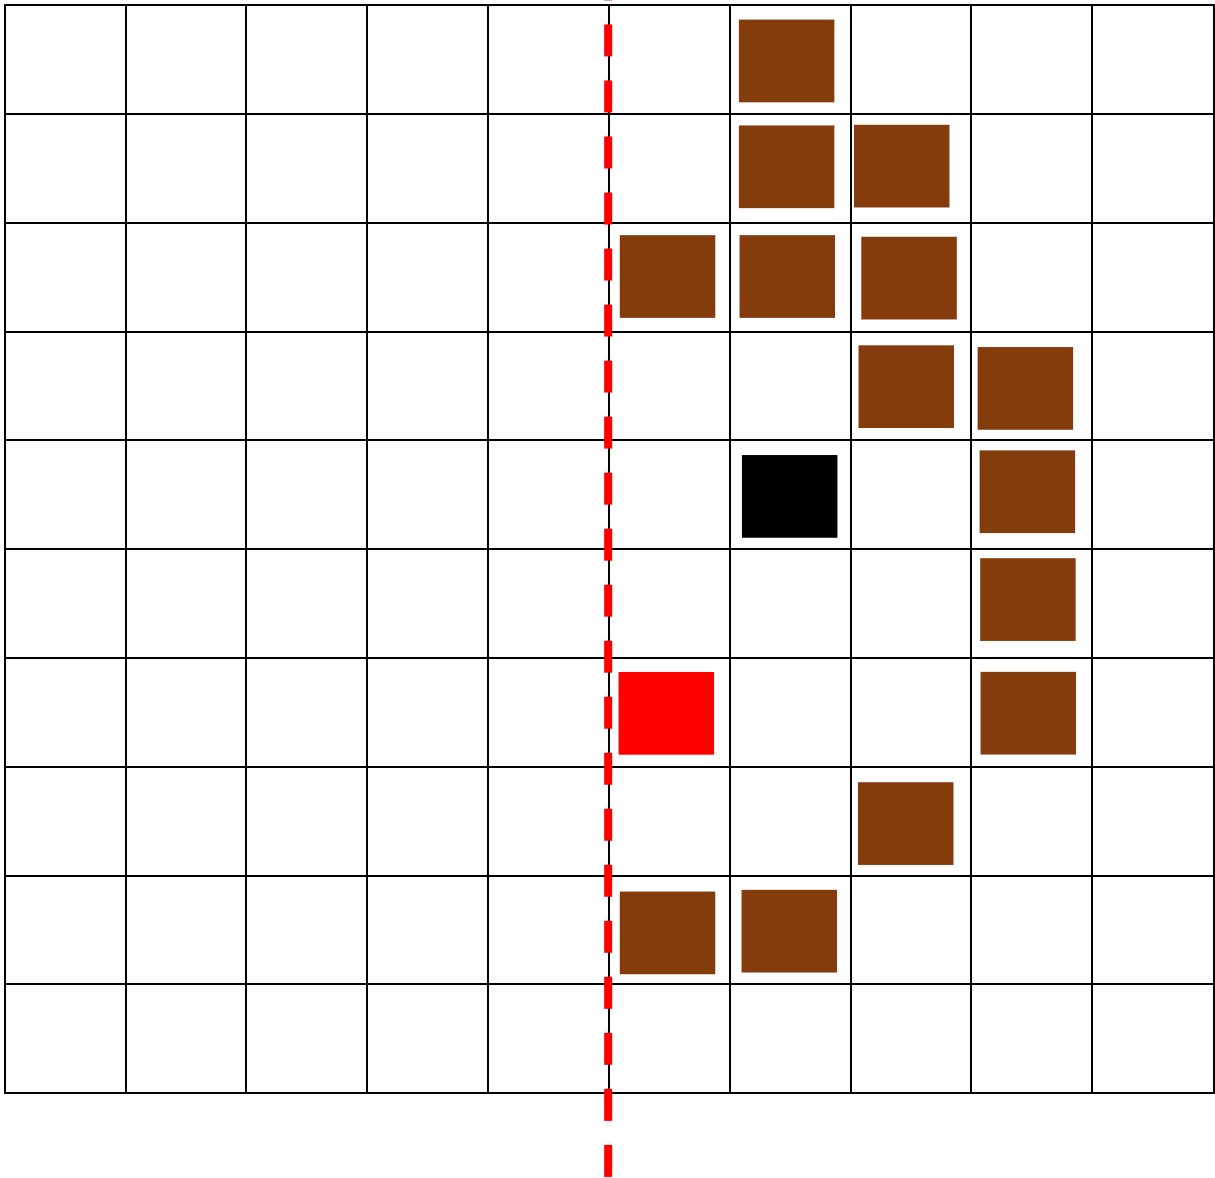

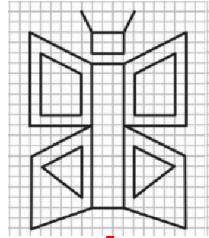

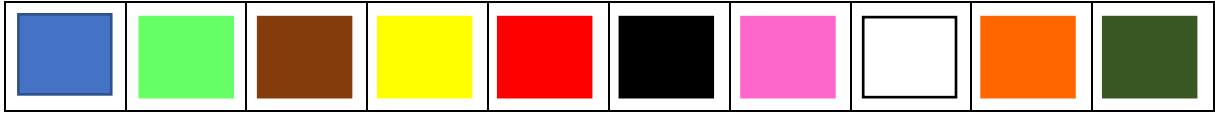

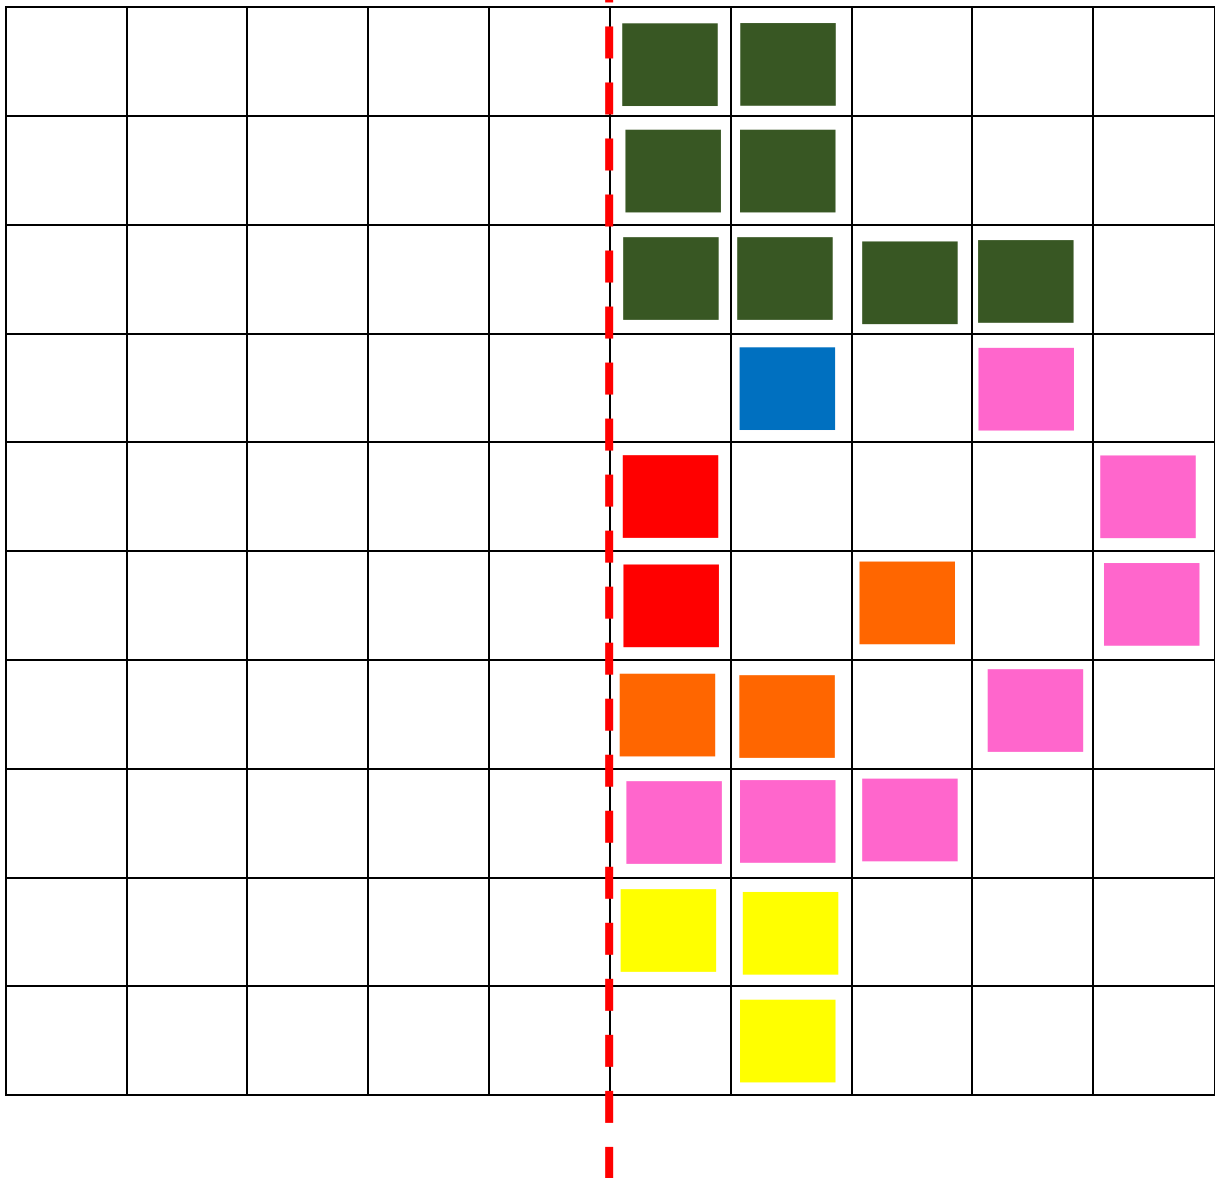

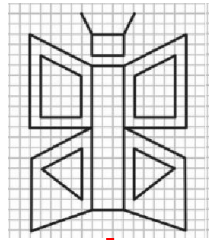

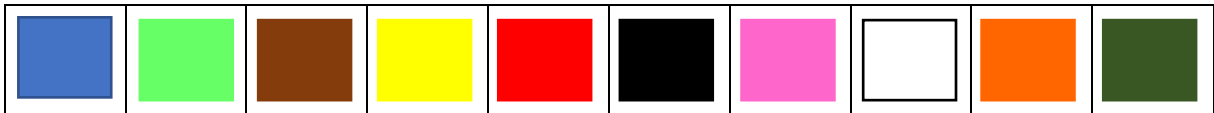

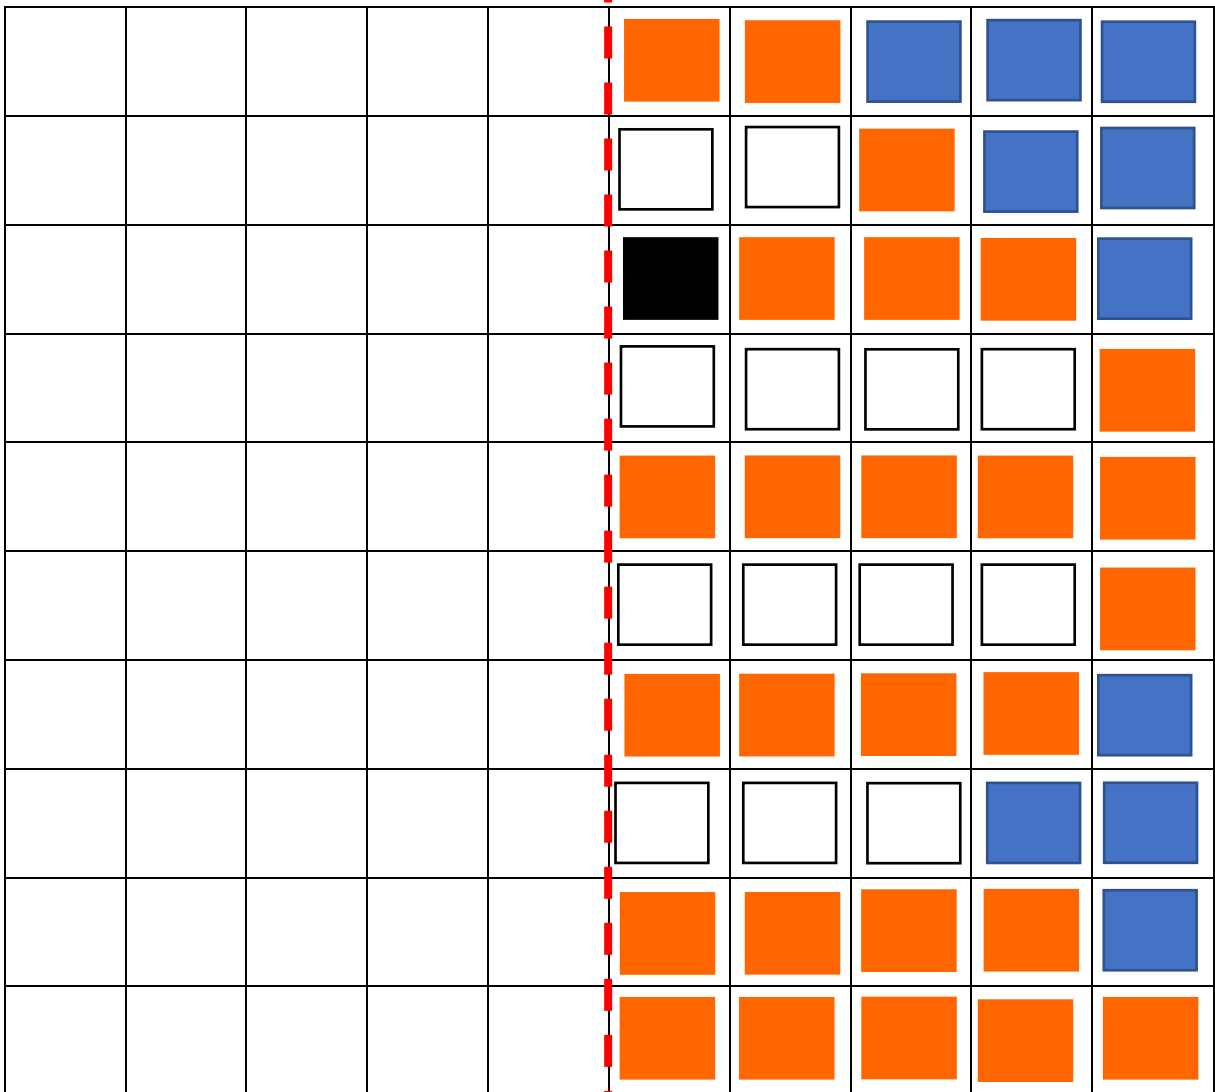

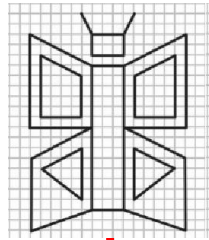

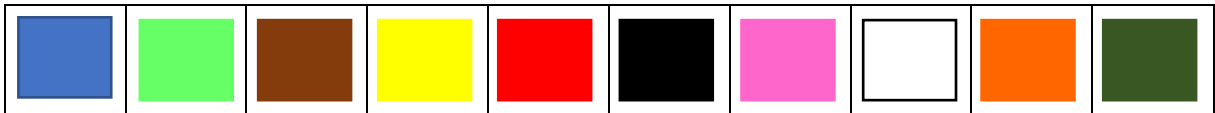

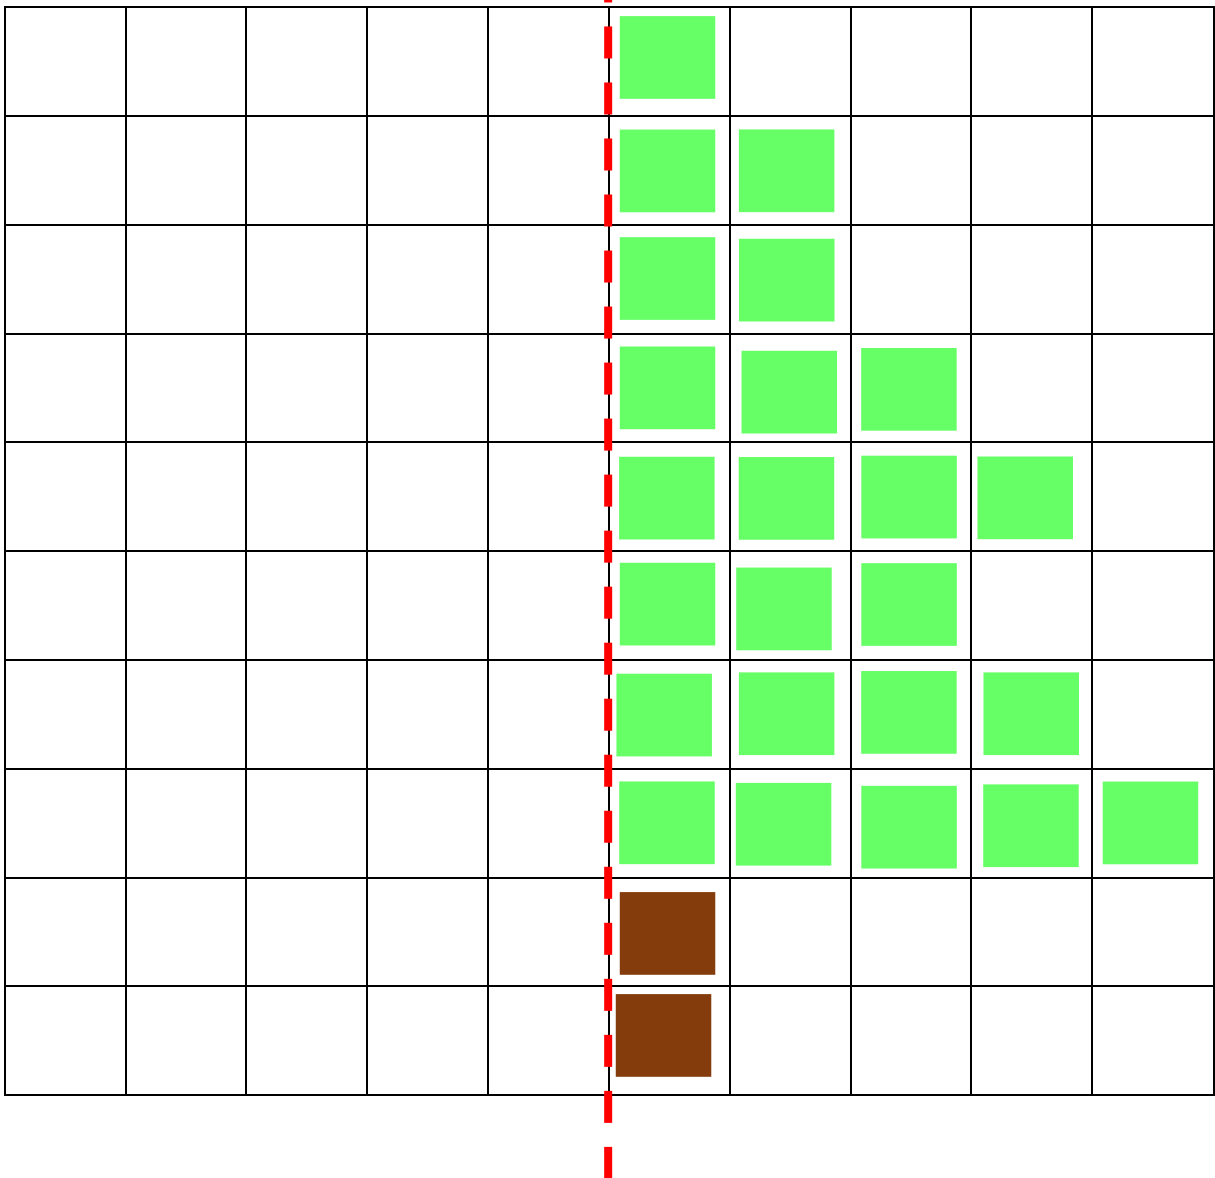

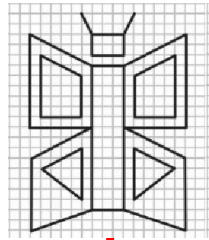

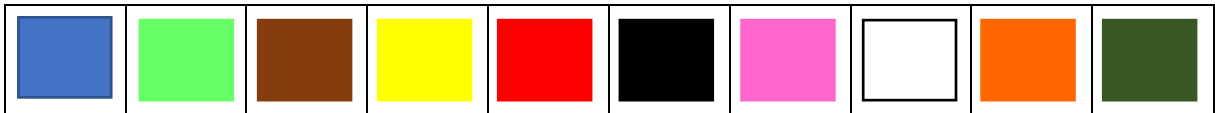

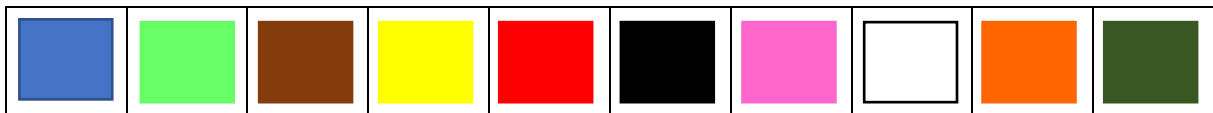

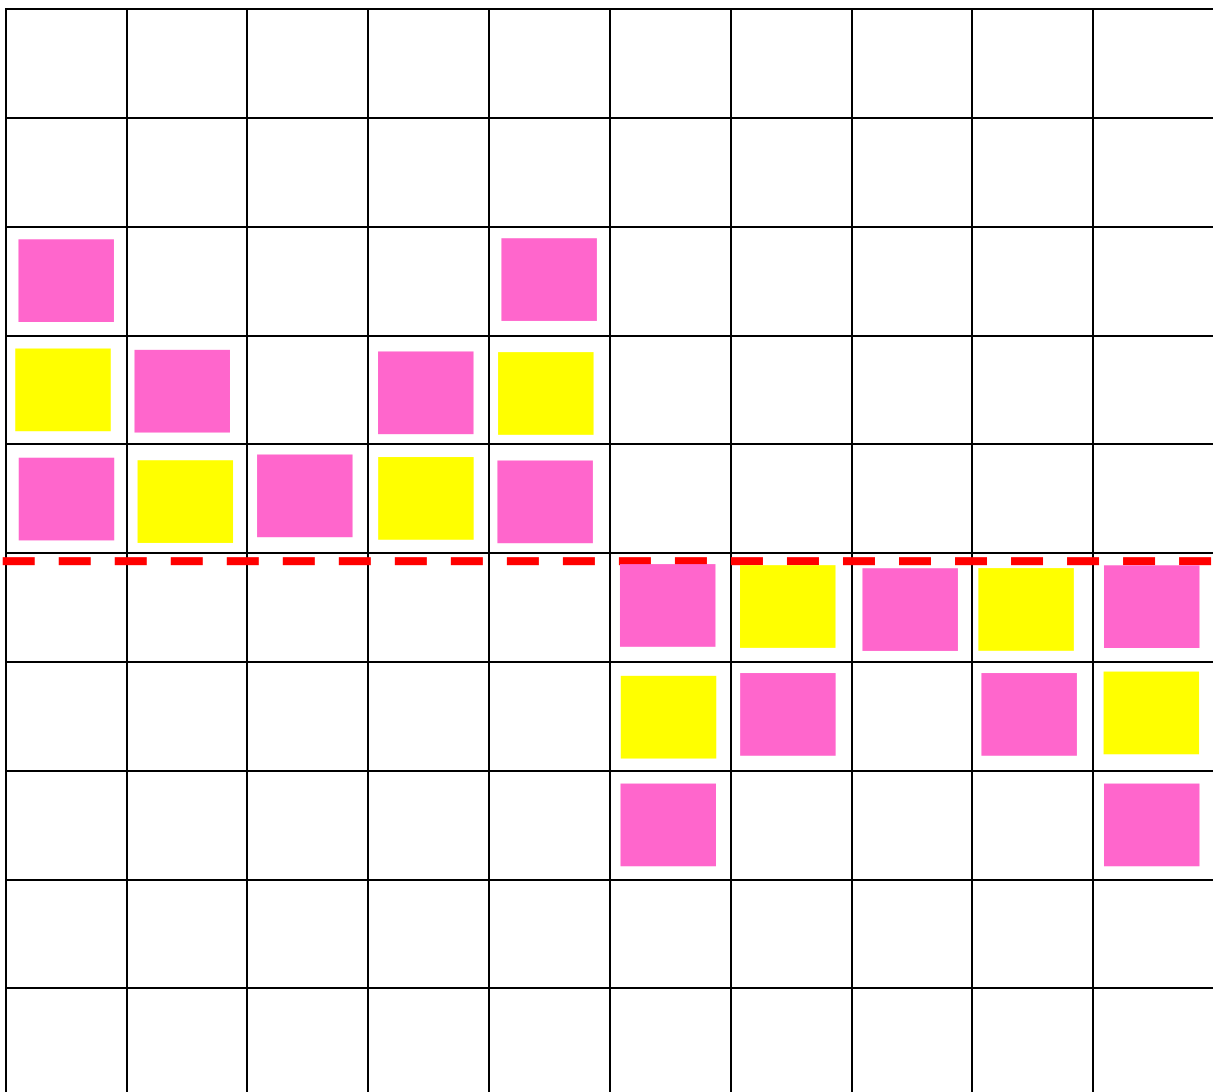

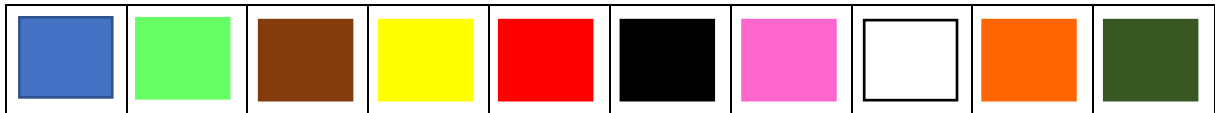

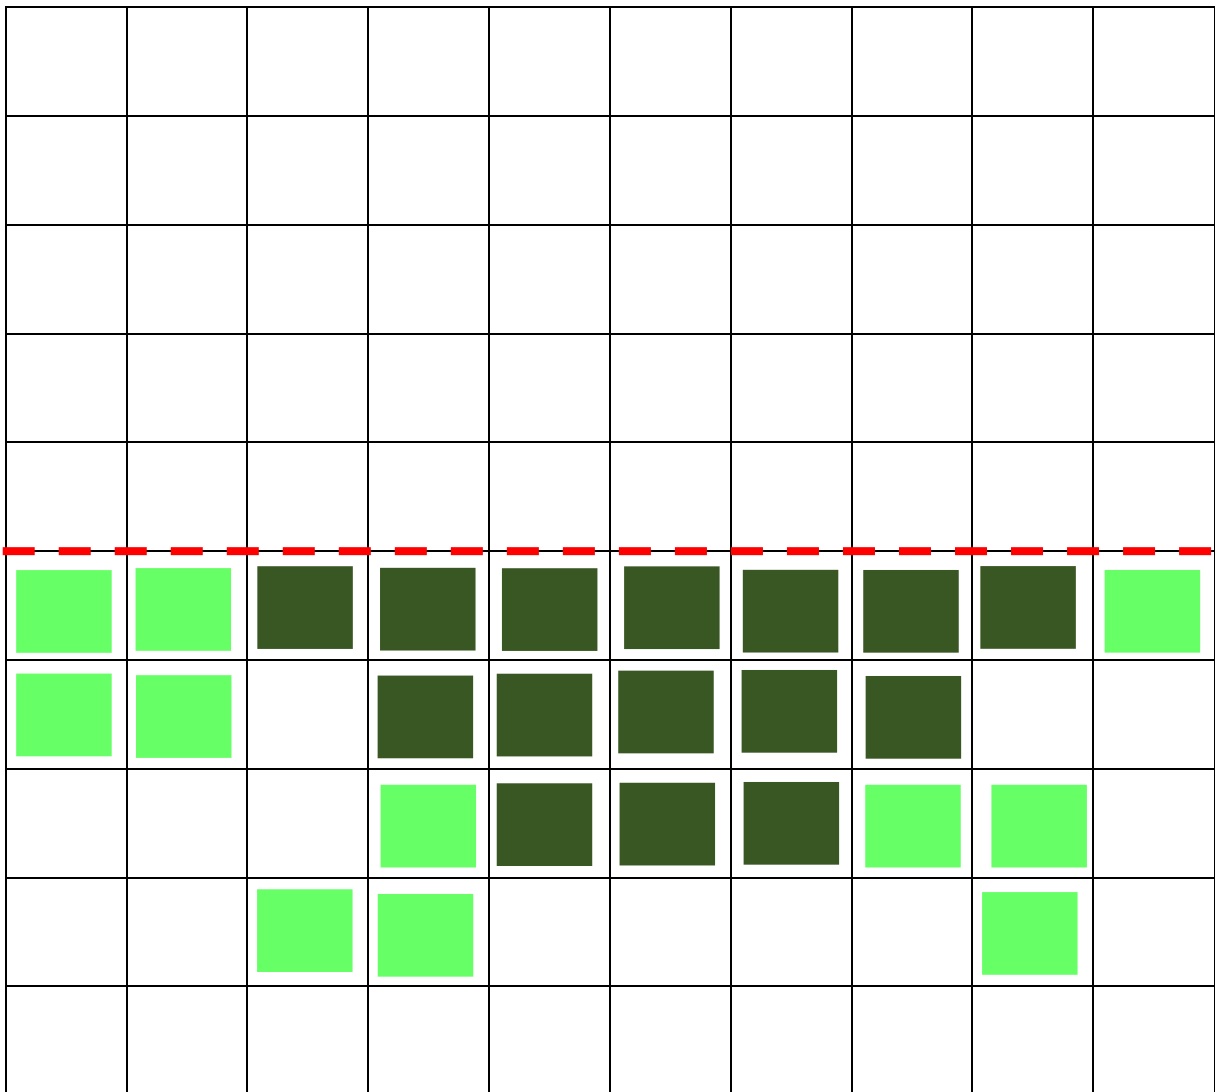

SYMÉTRIE ΣΥΜΕΤΡΙΚΕ

SYMÉTRIE ΣΥΜΕΤΡΙΚΕ

Matériel, si vous n'avez pas les petits cubes.
